

Your safety, your profit, our commitment

Cab Protection

In a world where common sense and experience seem to be a scarce commodity, time, pressure and inexperience are common place.

When the cost of a replacement cab averages £15,000+, it makes sense to protect the assets you have.

All of Prolec's PME variants offer cab protection either as standard or as an optional upgrade. Our cab protection solutions have motion cut or indication options.

Protect your people, equipment and bottom line.

**Please contact your local Prolec dealer to find the
best solution for your requirements**
