

Your safety, your profit, our commitment

## PM1

Prolec's PM1 is a low cost, easy to install, simple drilling and piling guide. It is used to set the alignment of the pile or drill angle, in either the vertical or horizontal plane.

Its easy-to-use, simple light system allows for true or degree operation from the safety of the operators cab.

- No more complicated levels—just set to angle and work
- No more fuss around the drill or pile point checking angle
- Increase productivity
- Increase performance
